ELSEVIER

The Journal of Systems and Software 46 (1999) 215–216

The Journal of Systems and Software

Contents Volume 46

Contents

Editor's Corner
Examining the effects of the "Application Revolution"
R.L. Glass 1

A concept of designing cheater identification methods for secret sharing
R.-J. Hwang, W.-B. Lee and C.-C. Chang 7

A phased reuse adoption model
S. Wartik and T. Davis 13

Technical controlling and software process improvement
C. Ebert 25

R-nets for the performance evaluation of hard real-time systems
S.M. Koriem 41

Optimal task allocation in distributed systems by graph matching and state space search
A. Tom P. and C. Siva Ram Murthy 59

A displacement addressing method for letter-oriented keys
S.-J. Wang and J.-K. Jan 77

Guest Editor's Introduction: The Silver Falls Workshop on Software Process Simulation Modeling (ProSim'98)
D. Raffo, W. Harrison, M.I. Kellner, R. Madachy, R. Martin, W. Scacchi, P. Wernick 89

Software process simulation modeling: Why? What? How?
M.I. Kellner, R.J. Madachy and D.M. Raffo 91

Simulation in support of CMM-based process improvement
A.M. Christie 107

Quantitative modeling for the interactive simulation of software projects
A. Drappa and J. Ludewig 113

The impact of feedback in the global software process
M.M. Lehman and J.F. Ramil 123

Integration of system dynamics modelling with descriptive process modelling and goal-oriented measurement
D. Pfahl and K. Lebsanft 135

Strategies for lifecycle concurrency and iteration – A system dynamics approach
A. Powell, K. Mander and D. Brown 151

Software process simulation to achieve higher CMM levels
D.M. Raffo, J.V. Vandeville and R.H. Martin 163

Software process simulation for reliability management
I. Rus, J. Collofello and P. Lakey 173

Experience with software process simulation and modeling
W. Scacchi 183

Software process white box modelling for FEAST/1
P. Wernick and M.M. Lehman 193

Modeling the FedEx IT division: a system dynamics approach to strategic IT planning
J. Williford and A. Chang 203

Software Process Simulation Modeling Workshop (ProSim'99) 213
